

## How does Assigned Math Practice work on Front Row?

The Assigned Practice feature on Front Row allows students to complete work on specific math standards for review or assessment. With Assigned Practice, all students can work on the same standard or individual students can review concepts with which they once struggled. We recommend using Assigned Practice as a way to check for understanding after a lesson, or as a formative assessment before beginning a unit.

Using the Assignment button on the Teacher Dashboard, teachers can directly send math assignments to students' accounts.

Here's how to use Assigned Practice:

### 1) Determine which standard you will be teaching and plan a lesson.

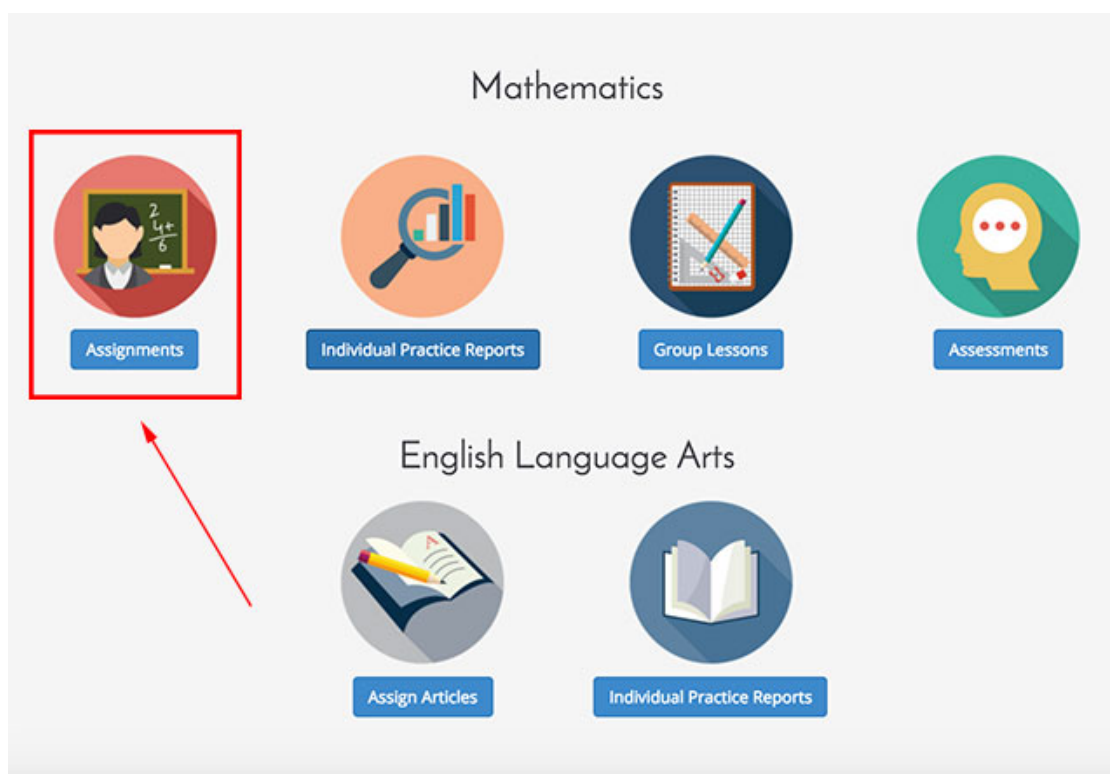

As with all math lessons, you first need to determine which standard and skill you will be teaching your students. Whether you base this information off unit plans or pacing guides, be certain that your lesson is based on a particular skill and standard.

### 2) Teach your students that skill in a whole group format.

Before your students log in to Front Row for Assigned Practice, teach the lesson you had planned. This way students will have some background information around the topic, reducing frustration and improving performance. If you are using Assigned Practice as a formative assessment, then you can skip this step and have students show what they know about the topic without instruction.

### 3) Send assignments to students.

Log in to Front Row and select the Assignments Button on your Teacher Dashboard.

Click the blue "+Add An Assignment" button to choose the standard you just taught.

## Standards Assignment

Assign a particular Common Core Standard.

You are premium: Infinitely Assignable

---

Use the dropdown menu to pick the domain in which you are working. If I just taught a lesson aligned with 4.NBT.2, for example, I would choose the Numbers & Operations in Base Ten domain.

## Pick a domain

✓ Counting & Cardinality, Operations & Algebraic Thinking

Numbers & Operations in Base Ten

Measurement & Data

Geometry

Numbers & Operations -- Fractions

Ratios & Proportional Relationships

The Number System

Advanced Geometry

Statistics & Probability

Expressions & Equations

Functions

K.CC.4A Count Objects

K.CC.4B Count independent of Arrangement

K.CC.4C Understand counting sequence

Use the scroll bar to pick the standard that you just covered. Note that all standards for all grades within the domain are listed. Once you have selected the standard, press the green "Continue" button.

Fact Practice

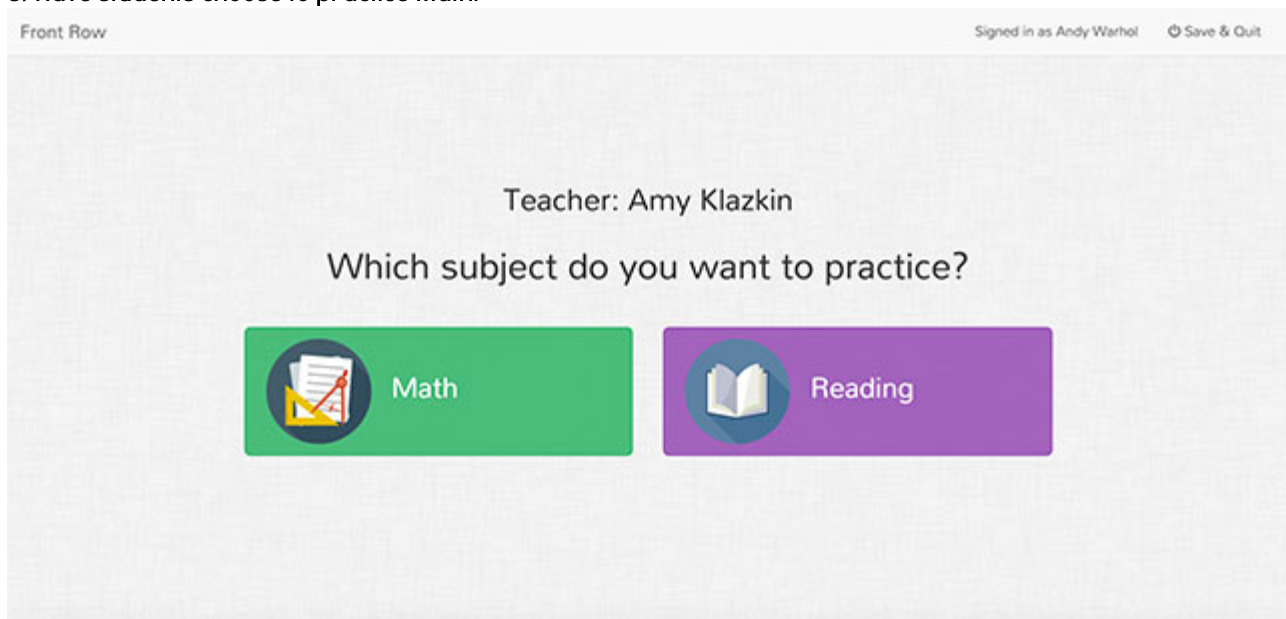

**4) Have students log in to Front Row.**

Students will log in to Front Row just the same way that they always have - with their first name, last name and class code.

The image shows the Front Row login interface. At the top, the text "Front Row" is displayed in a large, white, sans-serif font against a dark blue background. Below this, a white rectangular box contains the login form. The form is titled "Please sign in" in a small, grey font. It features three input fields: "First Name", "Last Name", and "Class Code", each with a light blue border and placeholder text. Below the input fields is a prominent green button labeled "Login" in white text. Underneath the "Login" button is the word "OR" in a small, grey font. At the bottom of the form is a blue button labeled "Create New Account" in white text.

**5) Have students choose to practice Math.**

The image shows the Front Row subject selection screen. At the top, the text "Front Row" is displayed in a small, grey font on the left, and "Signed in as Andy Warhol" and "Save & Quit" are displayed in a small, grey font on the right. Below this, the text "Teacher: Amy Klazkin" is displayed in a medium, grey font. Underneath, the question "Which subject do you want to practice?" is displayed in a medium, grey font. At the bottom, there are two large, rounded rectangular buttons. The left button is green and features a circular icon with a document and a red arrow pointing upwards, with the word "Math" in white text to its right. The right button is purple and features a circular icon with an open book, with the word "Reading" in white text to its right.

6) Students will see their assignment waiting for them on the right hand side. Have students click the assignment to begin.

The screenshot shows the 'Front Row' interface. At the top, it says 'Front Row' and 'Signed in as Andy Warhol' with a 'Save & Quit' button. Below the header, there are two tabs: 'Fact Practice' and 'Adaptive Practice'. The main content area is split into two columns. The left column is titled 'The Front Row All-Stars: Most Coins Today' and contains a leaderboard with the following data:

Name	Coins
Jackson Pollock	0
Henri Matisse	0
Salvador Dali	0
Andy Warhol	0
Pablo Picasso	0

Total coins: 263

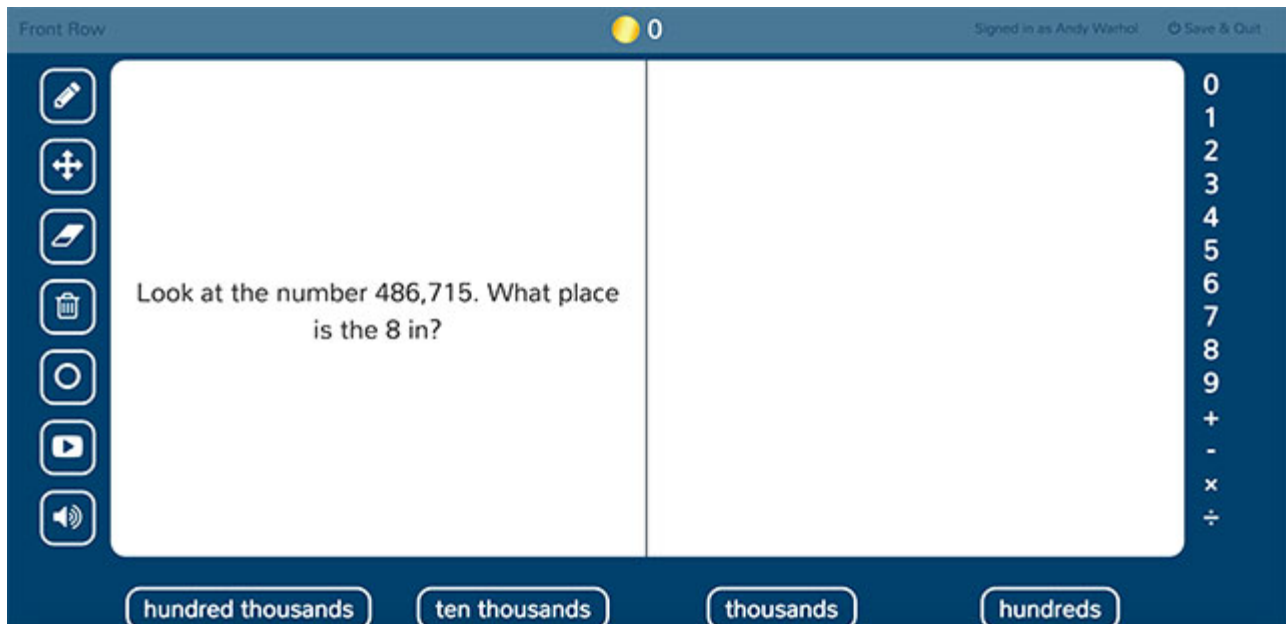

The right column is titled 'Assignments' and contains a card for 'Standards Assignment #33' with the code '4.NBT.2' and the date 'December 02, 2015'. A right arrow is next to the card.

7) Students will have one opportunity to complete the assignment. The assignment will stay listed until the student completes the assignment.

The screenshot shows the same 'Front Row' interface as before, but with a blue confirmation dialog box overlaid in the center. The dialog box contains the text 'Are you ready?' and 'You can only do this assignment once.' Below the text are two buttons: 'I'll do it later' (red) and 'Start' (green). The background interface is dimmed, showing the same leaderboard and assignment card.

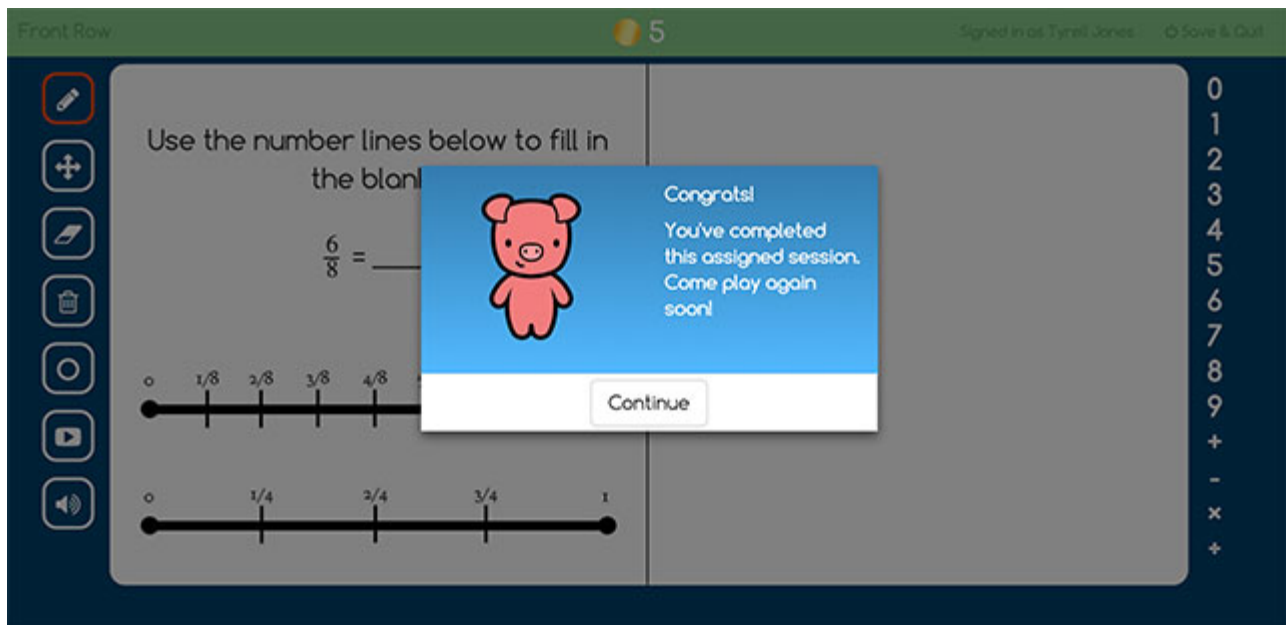

8) Students will answer 10 questions on the standard you assigned.

Note that you don't have to make sure students stop at 10 questions, the program will automatically do that for you.

9) Once students have answered 10 questions, the Assigned Practice will end and they will return to Adaptive Practice within the same domain.

We recommend that students continue practicing within the same domain, so that they receive remediation or enrichment on similar topics depending on ability level. As we can see in this example, the student worked on Level 7 with the rest of the class during Assigned Practice, but he or she is actually working on mastering Level 27 during Adaptive Practice.

10) Check class progress on the assignment.

To check class progress on the assignment you just sent to your students, click on the arrow icon next to the assignment.
